

FAST SECURITY

## AN EPOCH IN THE MAKING

Saab started life in 1937 in Trollhättan, Sweden, as an aeroplane manufacturer to provide aircraft for the Swedish Air Force, just as Europe was steeling itself for another war. The company's full name was Svenska Aeroplan Aktiebolaget, giving the world the acronym Saab.

The head office soon moved to the Swedish university town of Linköping, where this massive company has its largest operation today. It was there in 1945, amid various dreams of diversification, that a project to develop motor cars got underway. Today we are starting a new chapter. Fast Security, FS. Is the future car.

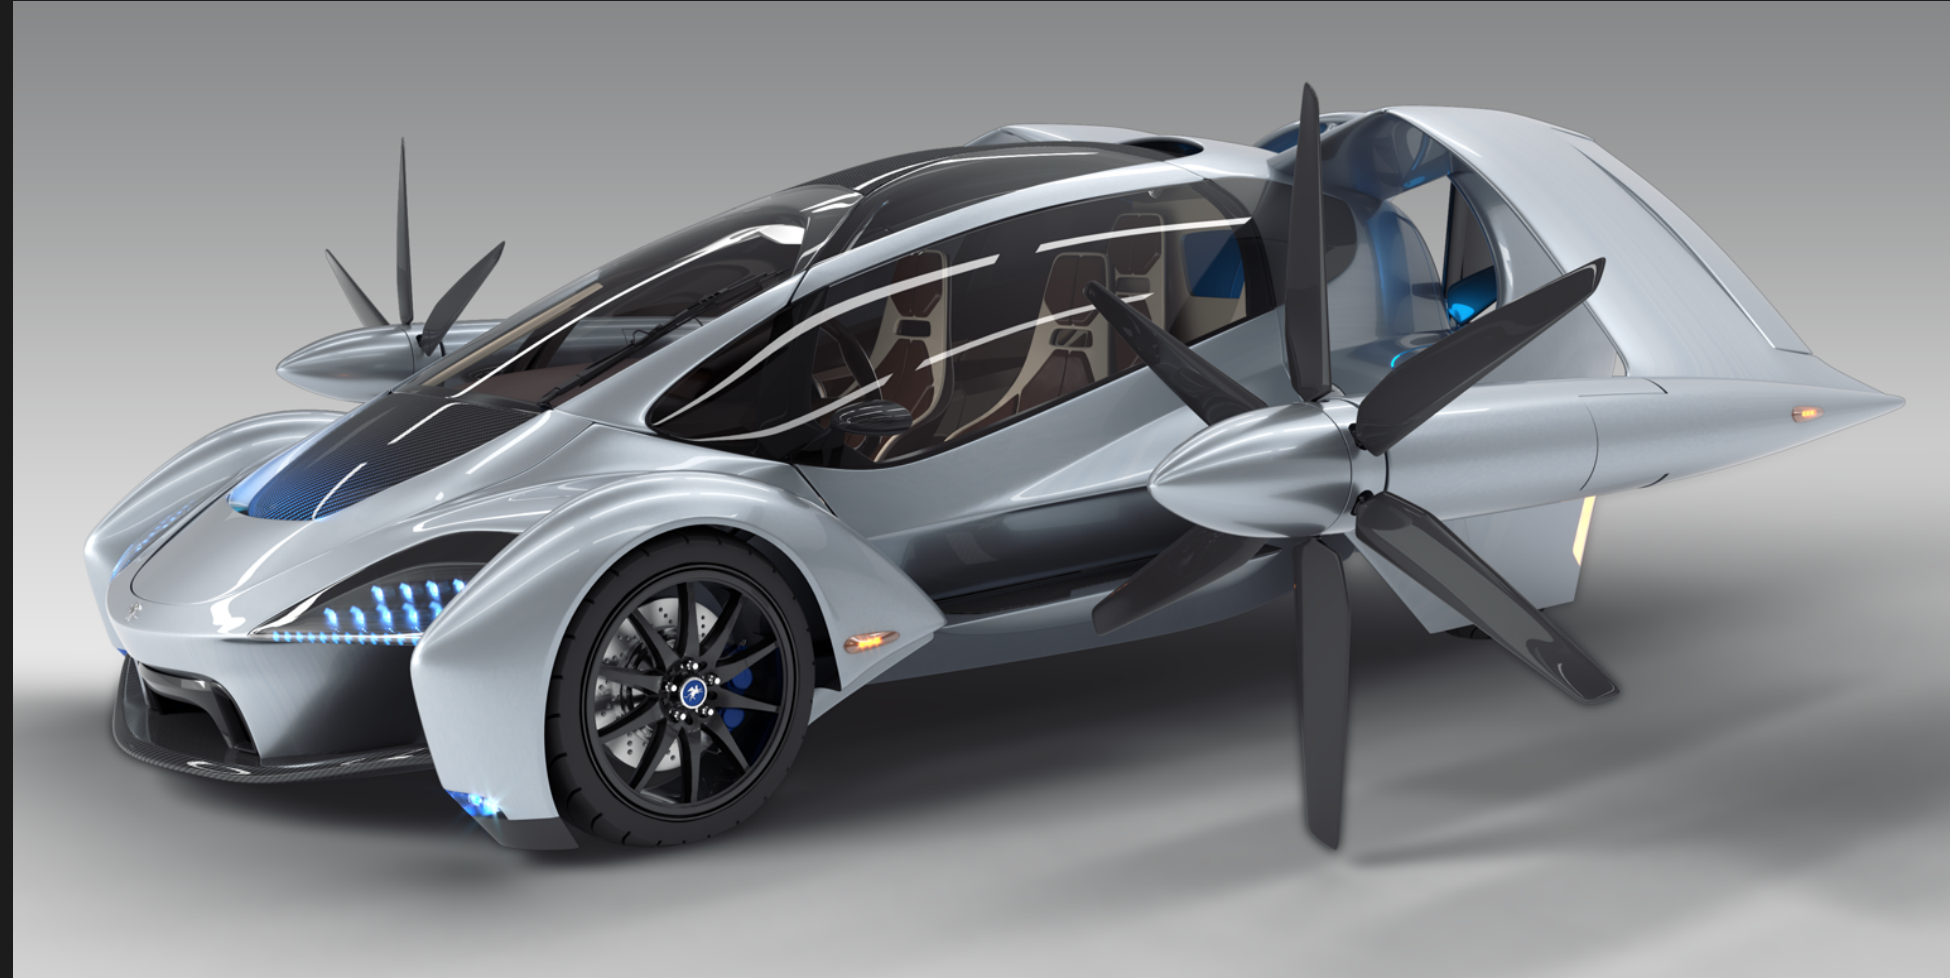

The interior's masterpiece-like proportions of the FS 1.0 are sculpted to deliver expansive convenience to driver and passenger alike. With the panorama windows you get an unsurpassed view of the stars. FS interior provide comfortable and first class seats to facilitate your trip.

FS is a car with impressive powerful prestanda. It delivers maximum driving dynamics without sacrificing comfort. It radiates power even when it stands still. The system is formed to perform short and long trips without requiring any effort from the driver himself.

## THE POWER OF FS

Welcome a new era of luxury cars. We provide you a high quality car, with a first class comfort.

FS offers intelligent technology that aims to develop the connection between driver and the vehicle, and simply overcome everyday challenges. FS assistant Artemys' helps you set the perfect temperature och set your favourite music.

Send a message to Artemys' and it will pick you up anytime and anywhere. Having a busy day? Tell Artemys to pick your kids upp att school or maybe to just go shopping. Get the most out of every day. Whether it's an important business meeting or a family weekend.

Wandering around and finding a parking lot will no longer be a problem. With Artemys' smart features, you can get off at your destination and let Artemys' park itself. At a smart button, Artemys' back to your destination.

The security is likely to be at least twice as good as a human driver. Artemys' keeps you safe and acts like a real-time guardian. With all round vision-tracking and with advanced sensor coverage. Artemys' can look through heavy rain, fog, dust and even the car in front of.

With incredible qualitative details, the FS model stands out from the crowd. Details that get any car look everyday compared to FS. Rims dazzling with its black curly color and the silvery lacquer that makes head turn. With lines showing its perfectly detailed work. It shows its speed but also an elegance that creates a perfect blend.

It does not only look good and blow peoples minds, it also has a functional design. Its paint has a water / dirt repellent feature that makes it easy for you as an owner to always have a clean car. You save not only time but also energy.
